

# ULTIMATE HAS NO OFF-SEASON.

BMW APPROVED COLD WEATHER WHEEL PACKAGES  
& ORIGINAL BMW ACCESSORIES.

# THE 7° RULE

## WHEN TO CHANGE TO BMW APPROVED COLD WEATHER TIRES.

When the temperature drops to 7 °C, it's crucial to have your BMW equipped with BMW Approved Cold Weather Tires. As a rule of thumb, cold weather tires should be installed on your vehicle well before experiencing the first signs of winter weather. Unlike summer or all-season tires, which will harden and lose their grip, BMW Approved Cold Weather Tires remain flexible at lower temperatures, thereby maximizing contact with the road's surface throughout the entire season.

**Switch to BMW Approved Cold Weather Tires at 7 °C, and drive assured knowing you'll be ready to brave the first snowfall with complete confidence. Visit [bmw.ca/winter](https://bmw.ca/winter) to learn more about BMW Approved Cold Weather Tires.**

### A TRUSTED SYMBOL.

BMW Approved Cold Weather Tires are designed, developed, and tested in collaboration with industry-leading tire manufacturers to ensure the best possible tire for your specific vehicle. The 'Star Marking' serves as our seal of quality, offering reliability, safety, and security on all your cold-weather journeys.

# ANATOMY OF A BMW APPROVED COLD WEATHER TIRE.

## 1. CONTACT PATCH.

The universal rule for better winter traction is to get the narrowest possible winter tire. Rounder casing designs add traction by cutting into the snow's surface. A stiff tread base and a special overlay creates an even pressure distribution in the tire footprint. This optimizes grip on snow and wet roads and provides a better steering response on dry roads.

## 2. GROOVES.

Wide grooves enhance winter traction by providing efficient channels to drain water and expel snow. The smaller shoulder grooves of modern winter tires provide increased snow and ice traction while maintaining dry handling. Special groove shapes allow more snow to be packed into the tread and expelled as the tire rotates for better deep snow traction.

## 3. TREAD BLOCKS.

Many winter tires feature a tread design that moves slush and water out of the way. The more open the tread design, the better the tire will perform in accumulated snow. The larger the tread blocks, the better the handling and steering response.

## 4. SIPES.

High-density sipe designs create more biting edges to help cut through water and slush so the tread compound can make better contact with the road. The sipes on the outer edges of the tread squeeze together under hard, dry cornering, allowing the tread to act as a solid block to improve handling.

# BENEFITS OF BMW APPROVED COLD WEATHER WHEEL PACKAGES.

## SAFE.

BMW Approved Cold Weather Tires are made from unique rubber compounds that stay flexible in cold temperatures and help improve braking distances in winter conditions. Plus, their aggressive tread pattern maximizes contact with the road to increase traction on snow and ice.

## TESTED.

Each and every BMW Approved Cold Weather Tire goes through a rigorous testing process and is calibrated to ensure that you can enjoy an optimal driving experience regardless of conditions.

## STABLE.

Ideal for dynamic driving styles, all BMW Approved Cold Weather Tires have been designed to provide optimal stability when cornering and driving at high speeds.

## TAILOR-MADE.

Your BMW, your style. Choose from a variety of options to find the wheels and tires best suited to your BMW's looks. BMW Star Approved Tires are developed in cooperation with premium tire manufacturers for maximum ride comfort and performance.

## EV APPROVED.

BMW Approved Cold Weather Wheel Packages for electric vehicles incorporate all 4 benefits listed, but additionally electric vehicle specific kits are uniquely configured to help reduce noise, rolling resistance and overall weight, thereby supporting battery life and vehicle range\*.

Learn more about your options and how BMW Approved Cold Weather Wheel Packages can be a part of delivering you The **Ultimate Electric** Driving Experience™.

\*Compared to conventional tires not specifically configured for EV vehicles.
